About Me

Experienced MERN Stack developer with a 3-year track record of a robust foundation in HTML, CSS, ReactJS, ES6, JavaScript, Typescript, Redux, Node.js, and REST APIs. Proficient in implementing JWT for authentication and Express Js, Postman, Git, and adhering to best practices for writing highly optimized code. Proficient in Agile collaboration.

Work Experience

Aug 2023 - present

The Sparks Foundation

MERN Stack Developer

- Worked Collaboratively with cross-functional teams for timely project delivery, gained web development exposure, and contributed to dynamic website creation using agile methodologies.
- Developed a streamlined and sustainable project architecture utilizing React JS, Redux, Node.js, Express, REST APIs, and the MVC pattern.

June 2022 - Aug 2023

Continental Biscuits Limited

MERN Stack Developer

- Created a deployable software solution that significantly streamlines the management of CBL products and information.
- Developed and deployed RESTful APIs for the software using Node.js and MySQL, while rigorously testing front-end components, user interactions, and biscuit-making products' listings to detect and rectify any defects or inconsistencies.

Dec 2021 - June 2022

Intern Software Engineer

Side Hustle

- Worked on an e-commerce mobile app with React, Node.js, RESTful APIs, and Express.js. Optimized performance, implemented Stripe for payments, managed product catalog, integrated chat support, and ensured secure transactions.
